

Installation Instructions for Microsoft HoloLens

Hardware requirements: To use the 3D Hologirlfriend software a Microsoft HoloLens Augmented Reality device is required. 1 GB of hard drive space is required to install the 3D Hologirlfriend software.

Set-up:

1. Click HoloLens App in the model's detail page. Unzip the file that is downloaded.
2. In the HoloLens Device Portal open the Apps link under System. If there is another program from 3DHologirlfriend in the Installed Apps dropdown select it and click Remove.
3. Under Install App -> App package click Choose File.
4. Navigate to the folder where you unzipped the install file. Locate the file 3DHoloGirlFriendHoloLens_1.0.x.0_x86.appxbundle and select it.
5. Click Open
6. Under Install App -> Add Dependency navigate to the folder where you unzipped the install file. Navigate to the dependencies folder, then the x86 folder. Locate the file Microsoft.NET.CoreRuntime.1.1 and select it.
7. Click Open
8. Under Install App -> Add Dependency navigate to the folder where you unzipped the install file. Navigate to the dependencies folder, then the x86 folder. Locate the file Microsoft.VCLibs.x86.14.00 and select it.
9. Click Open
10. Under Deploy click Go.
11. Find the newly installed App in the Installed Apps dropdown and click Start.
12. In HoloLens, find the new 3d Model installed and select to open
